

Weather Playlist Story:

As a registered user, I want to search the songs according to the current weather in order to save some songs to my spotify account

Right:

A playlist is curriated depending on the weather. I can play and save the song in the playlist to my spotify account with spotify API

Error:

No playlists have been displayed

Cannot access to the weather data

Wrong songs are presented

Reference:

Spotify API to save songs

Access weather data with weather API

Registered User Story

Revision: We don't make the function of storing the whole playlist. The connection is directly made to the Spotify account. Users can directly press the button of "like" to add the song to the playlist in the Spotify account.
