

Mood Playlist Story:

As a registered user, I want to get a playlist based on the result of the mood survey.

Right:

A correct playlist has been displayed based on the result of the mood survey.

Mood is saved to the database, so that the result of the previous mood survey can be accessed

Errors:

Wrong or no playlists have been displayed

Mood is not saved to the database

Reference:

Mood survey story

Spotify API

Registered user story

Revision: We do not store the information of the songs and the songs in Spotify do not have tags. Thus, we can only search with the Spotify API with the keywords of mood, like happy and sad.
