Unregistered User Story:

        As a non-registered user, I want to register a spotify account in order to use all features of this web app (OAuth against spotify)

        Right:

                The account is connected to the correct spotify account

        Error:

                Not able to connect to spotify

                Wrong account is connected

        Reference:

                Spotify API to login

Revision: We don't make the function of login to the webpp, so we don't store the information of username and password. The user only needs to login to Spotify and all features can be used.
